

## Arcflex Range of Standard Fittings and Couplings

Arcflex offer one of the widest range of fittings and couplings to suit all types of hose and bellows in all materials, grades and sizes. This is possible due to our large state of the art manufacturing facilities based at our main site.

This also enables us to design and provide bespoke items at the lowest possible prices.

These are just a small sample of the fittings we can offer.

We also specialise in quick release couplings and associated parts. Along with gaskets to suit all hoses.
