

Arcflex Protective Covers

These covers can be added to any of the arcflex range of hoses

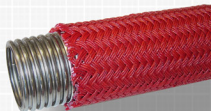

Type ACLS

Silicone cover - Very flexible solution for braid protection and wash down facilities.
The bend radius of the hose is not affected by this type of cover.

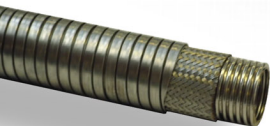

Type APBC

Polypropylene over braid, either as a cover over stainless braid or as an alternative to stainless braid. Removes chance of injuring operator's hands with sharp steel braiding wires.

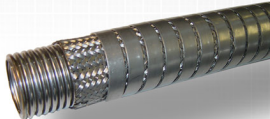

Type ASFB

Four walled interlock casing for complete mechanical protection against knocking scuffing and over bending.
(Bend radius reduced by 35%)

Type AFCS

Stainless heavy duty flat strip wound anti-scuffing protection coiled closely around hoses full length as a durable protection.

Type ARBR

Provided to lift hose away from abrasive surfaces which may cause damage to the hose. Shown over casing but can be provided over braid at spaced intervals.

Type AKCI- Kastex insulation cover

Type ATIG- Tempsil fire protection cover - ind. grade (aerospace grade available)

Type APVS- Polyolefin shrink sleeve (assortment of colours)

Type ASFB- Shown assembled

Type ASWC- Stainless heavy duty wire coil (available in other mat.)
